February 16th, 1918

Professor R. P. Thomson,

Department of Potany.

Dear Professor Thomson:

The work of the Summer Session Correspondence classes which are to be conducted during next winter, 1918-19, will include Potany. Professor Faull has told me that you are willing to undertake the work. I write this to you lest there should be any misapprehension as to what exactly is intended. During the present summer no lectures will be given in Potany. The science that is to be taught is Chemistry. With kind regards, I am,

Yours sincerely,

President.

Thomson, Robert Boyd
[Associate professor of botany]

19 February, 1918

Sir Robert A. Falconer,

President, University of Toronto

Dear President Falconer:

You have been misinformed. Dr. Faull has never even broached the subject of the Correspondence Course of the Summer School to me. This matter would need consideration and arrangement.

Sincerely yours,

R. B. Thomson
